

Nutriquire[™] + terrasym[®]

BEST PRACTICES GUIDE

HOW IT WORKS

Nutriquire + Terrasym is a synergistic combination of spore forming microbials and siderophores applied in the planter box providing ease of use, improved plant nutrient uptake and ROI.

APPLICATION (0.5 OZ./ UNIT OF SEED)

Individual/Single Row Units

Step 1

Remove provided scoop from packaging

Step 2

Using the scoop and application rates listed sprinkle Nutriquire + Terrasym into the individual/single row unit and stir gently for uniform seed coverage

Bulk Application

- Mix product into recommended units of seed, alternating between pouring seed and product for uniform seed coverage.
- For Bulk Application use scoop to sprinkle powder on seed into large black "Pro-Box" and mix in before putting seed in tender.
- Or apply in "seed pool" at the base of the auger when seed is moving up into planter.
