

BEST PRACTICES GUIDE

NutriPhi

HOW IT WORKS

NutriPhi is designed for beef, dairy, and hog operations to help manage biosolids, reduce run-off, and diminish harmful odors in barns, houses, and lagoons.

KEY BENEFITS

- Enhances nutrient value of manure
- Digestion of sludge & crust
- Reduces agitation time & cost

APPLICATION

SWINE MANURE

- 2.5 Gallons per 2,400 head hog building monthly
- Apply each month that you have missed since pump-out as a shock treatment
- Apply product directly to sections of the hog barn that have the highest solids accumulation
- Begin program with a minimum of 3 months remaining until pump-out

BEEF & DAIRY MANURE

- See chart for application rates
- Apply concentrate product during months when the lagoon is not frozen
- If the lagoon freezes and applications are missed during the winter months, apply the missed amount of product in spring as a shock treatment
- Begin program with a minimum of 3 months remaining until pump-out.
- Do not apply in dairy washout systems that contain concentrated amounts of anti-bacterial

RECOMMENDATIONS

- Begin manure management applications as soon as possible after pump out
- For best results apply consistently throughout the year

STORAGE

- Storage Temp: Above 34°
- Keep out of sun
- Do not freeze
- NutriPhi contains living organisms; therefore, the product may have an odor & is perishable
- Keep out of reach of children and animals
- Store in original container
- Keep container sealed tightly when not in use

SWINE		
Size of Herd	**Application/Month**	**Total Gal/Year**
2,400	2.5 gal	30 gal
DAIRY & BEEF		
100	2.5 gal	30 gal
500	12.5 gal	150 gal
1,000	25 gal	300 gal
