

BEST PRACTICES GUIDE

Soy$_{fx}$ ™

HOW IT WORKS

Soy$_{fx}$ ™ is a specific/unique combination of identified and tested microbials that elicit a positive crop response. Soy$_{fx}$ unlocks the plant's ability to produce growth regulators and metabolites that enhance production through biosynthetic pathway efficiencies. This leads to more branching per plant, increased flowers and pods, increased nodulation, and overall reduced plant stress.

APPLICATION (2 OZ / CWT)

SEED COAT APPLICATION

- **STEP 1**
  Load into separate tank from fungicide and insecticide (Can be mixed with inoculant)
- **STEP 2**
  Apply 2 oz./cwt of product to the seed
- **STEP 3**
  Plant within 100 days of treatment

TIMING

SOYBEANS
Seedcoat
Within 100 days of planting

LEAFY CROP

- Preplant with water or other compatible biologicals.
- Post applied with water and/or other compatible tank mix partners 2-6 leaf.

KEY BENEFITS

- More branching per plant
- Increase in flowers and pods
- Increased nodulation
- Reduce plant stress
- Aids in hail damage recovery

STORAGE

- Storage Temp: Between 39-82°
- Keep out of sun
- Do not freeze
- Soy$_{fx}$ contains living organisms; therefore, the product may have an odor & is perishable
- Keep out of reach of children and animals
- Store in original container
- Keep container sealed tightly when not in use
