

# 2025 PERFORMANCE GUARANTEE

**NueNutri™ is an optimized liquid biostimulant containing vinasse, amino acids and essential micronutrients, to enhance crops' flowering periods and improve yield. NueNutri contains bioactive compounds that activate specific metabolic pathways, especially important at the pre-flowering stage, to enhance yield by reducing flower abortion and mitigating abiotic stress.**

- **Stimulates plant metabolism to limit flower abortion and maximize yield**
- **Reduces the effects of plant abiotic stress including drought, frost & high temperature**

***We understand that adopting NueNutri on your operation means investing in a product and technology that may be new to you. To honor your commitment to giving NueNutri a try, we're backing you with our Performance Guarantee.***

***We developed the NueNutri Performance Guarantee to give farmers peace of mind as they experience the benefits of NueNutri.***

*Due to our extensive research, the NueNutri Performance Guarantee stands behind minimum yield increases on the following approved crops:*

Approved Crops	Minimum Benefit
Corn .....	2.0 bu/ac
Canola .....	1 bu/ac
Sunflower .....	100 lbs/ac
Wheat (including durum) .....	2.0 bu/ac
Soybeans, Peas, Lentils .....	1.0 bu/ac
Potatoes .....	2.0 cwt/ac
Cotton .....	15 lbs/ac
Dry Beans .....	50 lbs/ac

*If the NueNutri application does not yield the minimum yield increase on approved crops for any given field, YieldMaster Solutions will replace the product to the quantity used on that field.\**

*Conditions apply – see program terms and conditions.*

#### **\*Program Terms & Conditions**

- Purchase and apply at least 160 ac of NueNutri by July 15, 2025. Claim submissions with full documentation must be received via the YieldMaster Solutions website by December 1, 2025.
- Store NueNutri properly: Below 80° F, low humidity conditions and out of direct sunlight. Large temperature fluctuations should be avoided.
- Apply NueNutri on approved crops as a foliar application at labeled rates and per use guidelines. †
- A representative check strip within the same field as NueNutri is being applied is required. The check strip must represent the larger of either 10% of the applied acres of the field or 5 ac. The check strip must represent similar soil type and topography of NueNutri-treated areas of the field.
- Use a harvest monitor or weigh wagon to measure the yield of the entire NueNutri treated area in any given field against the full check area.
- If the harvest monitor or weigh wagon does not show at least the minimum guaranteed yield increase for approved crops on the NueNutri treated area vs. the check area, YieldMaster Solutions will replace your NueNutri product applied on that specific field. Check strips are required on each distinct field that NueNutri is applied. Each field must be assessed and claimed separately.

- Apply within a registered US state. †
- NueNutri Performance Guarantee does not apply to extreme situations of crop failure. Any claimed field must have a check strip yield within 40% of established crop yield averages for the area.
- The NueNutri Performance Guarantee is limited to replacement product to the total amount purchased within the terms and conditions of the program.
