envita®

N-fixing bacteria that works from within the plant, applied in-furrow OR foliar, and across crops to supplement nitrogen where and when it's needed.

KEY BENEFITS

- N-fixing bacteria that works within the plant all season long!
- Works throughout the entire plant to supplement nitrogen where & when it's needed.
- Easy to tank mix and apply in-furrow or foliar.
- Supplies nitrogen at critical growth stages during stress periods where nitrogen uptake from soil is not sufficient enough to meet crop demand

IMPACT ON THE PLANT

- Envita enters the plant through the root zone *(in-furrow application)* or leaf stomata *(foliar application)*
- Bacteria works its way into the plant cell and colonies within the actual cell
- The bacteria creates small vesicles or "air pockets" within the plant cell that have the ability of capturing nitrogen from the atmosphere
- Envita repopulates within the cell

CONTROL ..... ENVITA

APPLICATION

0.8 OZ / ACRE

In-Furrow/Foliar

Tank Mixing

Step 1
Load water into the application tank

In-furrow - 3-5 gal/acre

Foliar - 15-20 gal/acre

Step 2
In-furrow - Load starter fertilizer into tank

Foliar - Load adjuvants, compatible herbicides, fungicides & insecticides

Step 3
Load 0.8 oz/ac of Envita into mixture in the application tank - 32 oz. of Envita treats 40 acres

PACKAGING

4x32 oz
